

## A5 – THE SEA

### ➤ Art Book

The last step of the project is to collect the whole collaboration between the three VET schools in a unique book. We are going to create a digital book (for checking online) and a printed book (for shown to the audience).

For to do this, each student will scan their 'fish' artwork' and send to the teacher. They can add some written about the project, scan and included in the personal cover. Each student will have an A4 paper to show their artwork and information.

Once we have all the collaboration works, we will put it together in the **#Fishes** book.

This is a good way to promote the aim of this project to the rest of the school and society organizing an itinerant art exhibition to promote awareness.

*\*This is a preview about how it will be the final project book.*

“This means as a metaphor, that we are going to create a 'sea' as a book, that it will be included the whole 'fishes' artworks, swimming through the sea. A big sea to promote human rights, tolerance, and respect for migrants.”
