

PARENTS WORKSHOP ERASMUS+ KIDS

*Poland, Poznań,
Szkoła Podstawowa
nr 23 im. gen.
Józefa Bema*

Introduction

Project Erasmus+ KIDS dealt with the financial education. There were 30 parents during the workshop. Before workshop parents had to answer 10 questions concerned their knowledge about entrepreneurship. The same questions were given after workshops. The results are presented below.

Before workshops

Question	A lot	A little	Not much	Not at all
1. I have knowledge on banking terms.	13	11	4	2
2. I know bank credits and their details.	10	6	12	2
3. I have knowledge on investment types.	9	8	9	6
4. I have knowledge on the content of financial literacy.	8	11	7	3
5. I am aware of how to protect spending and income balance.	14	8	8	0
6. I know how to make income/expenditure planning.	18	5	3	4
7. I know how to be an example for my child/children about financial literacy.	11	6	10	5
8. I know the function of need and want/desire concepts.	8	8	9	5
9. I know the process for bank accounts.	13	9	7	1
10. I have knowledge on how to save.	16	11	2	1

As the results show the lowest knowledge before workshop parents have got about bank credits and their details and about the function of need and want/desire concepts. The results are about 53% for „a lot” and „a little” answers. Parents said also that they’ve got overall view, but don’t know how to be an example for their child/children about financial education. Almost 57% said they know about this issue a lot or a little. That’s why 43% respondents don’t know it at all or not much. The highest result is given in question 10. concerned knowledge on how to save. The result is 90% of parents who know the issue „a lot” or „a little”. Other results are on the same level, over 73% for „a lot” and „a little”.

After workshop

Question	A lot	A little	Not much	Not at all
1. I have knowledge on banking terms.	22	7	1	0
2. I know bank credits and their details.	20	8	0	2
3. I have knowledge on investment types.	19	7	4	0
4. I have knowledge on the content of financial literacy.	21	3	3	3
5. I am aware of how to protect spending and income balance.	24	5	1	0
6. I know how to make income/expenditure planning.	25	3	2	0
7. I know how to be an example for my child/children about financial literacy.	22	4	4	0
8. I know the function of need and want/desire concepts.	13	10	4	3
9. I know the process for bank accounts.	27	2	1	0
10. I have knowledge on how to save.	23	6	0	1

The growth of knowledge is noticeable. In four questions: 1, 5, 9, 10 concerned the knowledge on banking terms; the awareness of how to protect spending and income balance; the knowledge on proces for the bank accounts; on how to save, respondents in 97% said they know „a lot” or „a little” the issue. In these questions the growth of knowledge is about 23%. The growth of knowledge is noticeable in each question, the average of the growth is about 13%-19%. All results are over 79%.

The summary

Firstly, the growth of knowledge about the financial literacy after the workshop is discernible. All the results are over 79% for „a lot” and „a little”. The average growth of knowledge for the questions is about 13%-19%. Parents said that they would like to take part in more workshops like this one and thet it meet their expectations. They also mentioned that they’re going to try think more carefully about their spendings and will try to teach it their children. They thought the workshop was interesting. As it can be seen the growth of knowledge after the workshop is noticeable and it responses to the need for financial education.
