BEGINNINGS...

Beginnings are always difficult. But when you have a team of teachers and students that are fully committed, when your principal supports and guides you every step of the way, things can't possibly go wrong, can they?

FIRST STEPS....

So here we are, plunging into this exciting adventure that will take us to new frontiers of knowledge and personal development.

PRESENTATION OF THE PROJECT

We started by making a Power Point presentation of the project (in Romanian) which was meant to show the students and teachers what the project was all about. After several reviews we managed to complete the final version which was subsequently presented to the students from all classrooms and profiles and to the entire teaching staff within dedicated meetings. We launched the invitation and encouraged everyone to join in.

NOT SO EXCITING BUT NECESSARY

There are many things to consider when you start such a complex undertaking.

Making sure that you have the right procedures in place is one of them.

An important stage was setting up the selection procedure. This implied thoroughly examining application files, documents, registering names, tec.

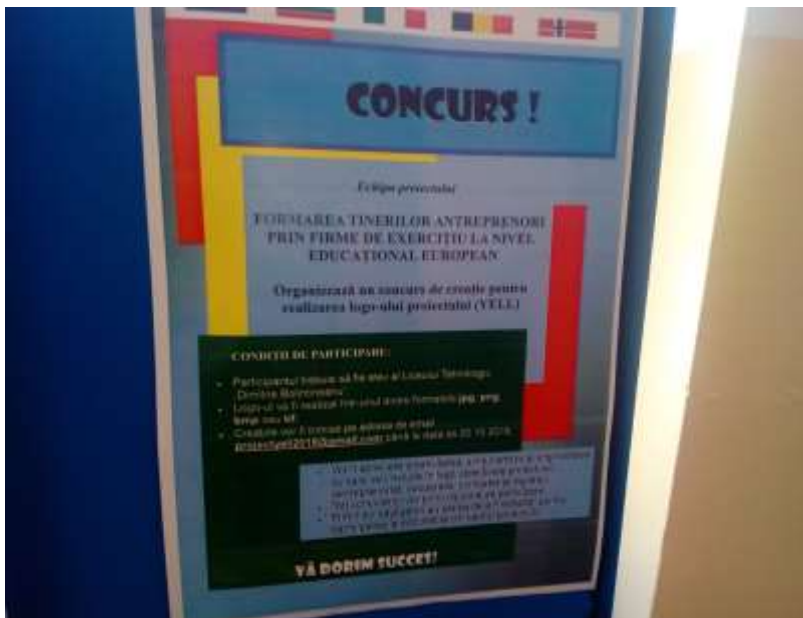

It was tedious work but it was worth every minute due to the wonderful response received from our students.

CREATIVITY AT ITS BEST

By far the most exciting part of this first month into the project was the first competition: the logo contest. It gathered ideas of such imagination, at the same time illustrating that our students are quite skilled in working with certain digital apps such as Photoshop
