Dear parents/carers

5M children will be participating in a Project with other European schools during their Spanish language lessons. The topic is called 'Trojan Horse ' and the main objective is for the children to work on coding and robotics skills so that they become familiar and understand more about coding and programming.

The project is based on a virtual Escape Room. The children will be working in international groups and be in charge of creating different activities and events which the other groups will have to complete to escape.

The different events created will be related to coding and programming and the final product will be a digital book with all the activities about coding and robotics made by our pupils, including photos, pictures, text and audio.

They will share their produced work via 'Etwinning' which is an online community of schools in Europe where projects can be collaborated on in a secure network and platform.

☐   I give permission for my child to work on the eTwinning Project

☐   I give permission for my child's photo to be used for the etwinning Project

☐   I give permission for videos of my child to be shown on the etwinning platform.

☐   I give permission for my child to participate on the etwinning platform to send and receive chat messages and participate in live meetings
