

DEFORESTATION OF THE AMAZON

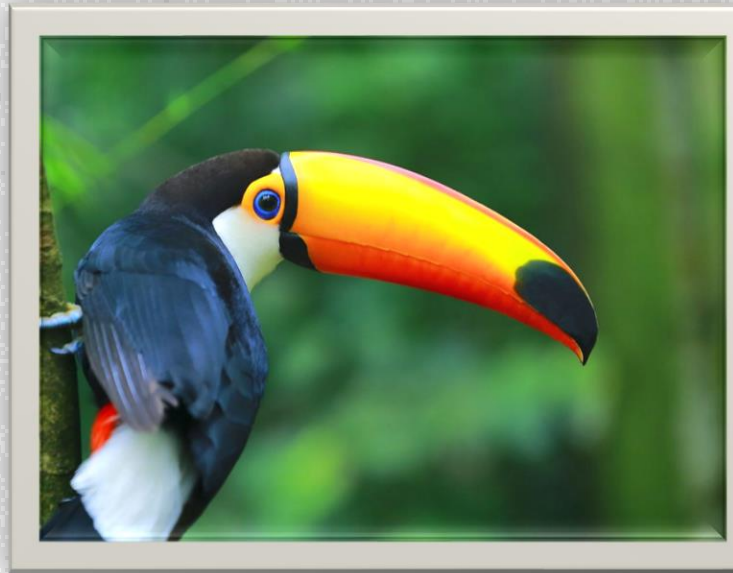

Licari Elizabeth, Sganga Lucrezia, Mancuso Salvatore

WHAT IS ABOUT?

In the amazon forest hosts about three million species of plants and animals and one million indigenous people.

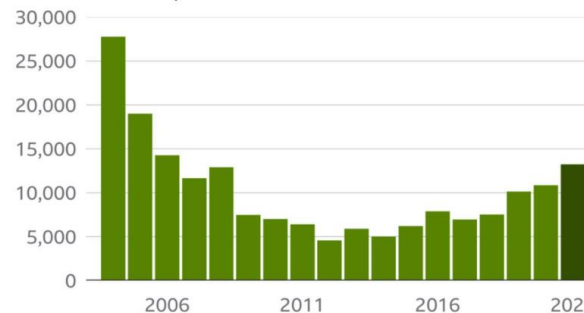

Deforestation in the Brazilian Amazon forest was very intense, that it attracted the attention of the country to stop this phenomenon. 5110 square miles of forest were lost during the period 2020-21. With this increase Brazil promised to end deforestation by 2030 during the climate summit of COP26. During the climate conference in Glasgow, Brazil signed along with many other countries. It was an agreement to end and reverse the practice of deforestation.

The deforestation of the Amazon has increased under President Jair Bolsonaro, who encouraged agriculture and mining in the rainforest.

DEFORESTATION OF THE AMAZON

KATY WATSON

Analysis
By Katy Watson
South America correspondent

THE JOURNALIST'S THOUGHT

- The article reports the author's opinions regarding deforestation and who caused the increase of this phenomenon, not safeguarding his country but enriching himself economically.
- His opinion is implicit because it expresses his thought by listing data and facts.
- The author reveals himself against deforestation, because the Amazon rainforest represents the fundamental nucleus of the world and is also a vital deposit of carbon that slows down global warming. Journalist Katy Watson reports these issues to raise awareness to block the climate change phenomenon.

JAIR BOLSONARO

REFLECTIONS

CONTENT

the content was very precise, we immediately understood what the problem was and the intentions of the author when he published the article.

TARGET

The article was written to sensitize readers to the phenomenon that is happening in Brazil.

AUTHOR

I agree with the author. Spreading this news helps to fight this phenomenon. The more people who know what's going on in the world, the better.

EMOTION

Deforestation is always a much talked about topic. Unfortunately, this phenomenon is widespread all over the world, and fortunately there are many people and countries trying to combat it. I'm very happy about that because it means that there are still people in the world who take care of the world. And I'm sad and angry because deforestation is still a widespread practice.
