

To the future generations,

This is a letter from 2022. I hope that by the time you are reading this, the environment is in better condition than it is now. Many people are trying to fix this situation, but the environmental pollution and its effects on our planet are getting worse and worse as the years pass. Global warming, ice-melting, animals dying, harmful gasses in the atmosphere...But sadly people still seem to not care about the future of this planet. Our planet! I'm really curious about how things will be in a century or more. So, tell me. Is the situation still the same? Have you done anything to help the environment or are things still the same? If they are, it's time for change. You have to help the planet and make it better, safer and healthier for you and the other future generations. I hope you'll find my advice helpful.

With love, the past generations

Konstantina Anastasia Papaioannou
