

Overpopulation

Incredible Solutions To Overpopulation

1. Better Education in rural areas, especially for girls
2. Access To Contraceptives, and debunking widely held myths about it
3. Education On The Subject
4. Family planning

About 61 % of the global population live in Asia, the world's most populous continent. China alone is home to 1.44 billion people and India to 1.39 billion, accounting for 19 % and 18 % of the world's population respectively.

As you can see, the impact of overpopulation is **tremendous**. Overpopulation is one of the biggest challenges humanity is facing and threatens the near future of the planet in **economic, environmental and social terms**.

Overpopulation is caused by a number of factors:

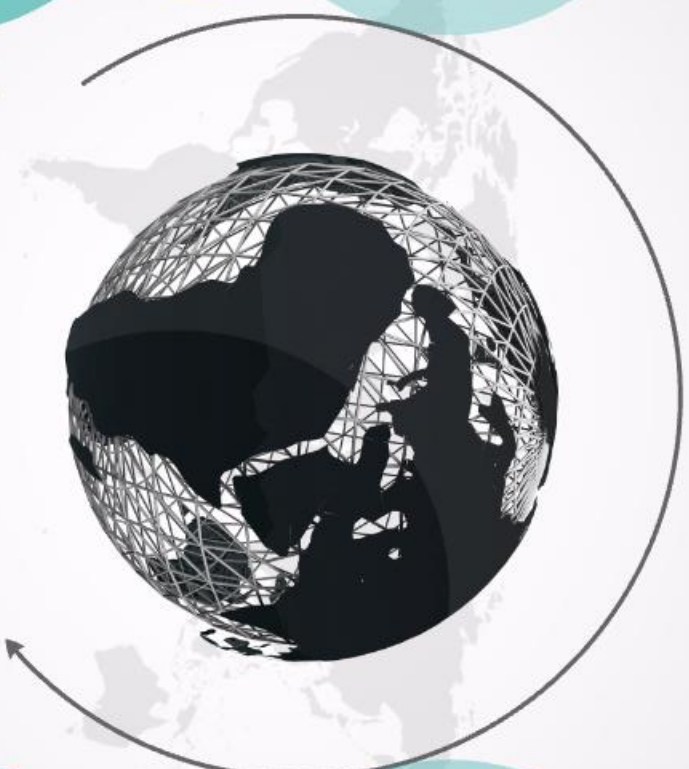

- Reduced mortality rate
- Better medical facilities
- A lack of educational resources
- Lower Life Expectancy

To say that there is too many people is sort of an unkindness to that person who thinks they are too many

Fatal Effects of Overpopulation

1. Depletion of Natural Resources
2. Degradation of Environment
3. Conflicts and Wars
4. High Cost of Living and unemployment
5. Pandemics and Epidemics
6. Water Shortage

Calculation says that only 4 billion people is the carrying capacity of the Earth, but today we have almost 7 billion mouths to feed.

Overpopulation is an undesirable condition where the number of the existing human population exceeds the actual carrying capacity of Earth.
