

Dear future students,

I am Marilita from a class of 2022. I just want you to know that you should do your best about your dreams. Don't be afraid to have big dreams because you are fully capable of doing everything you desire. It is important to understand the environmental problems such as air pollution. You might think that you are just a normal person without enough power. But, in fact by making the right choices you can change the world! Last but not least, you have to remember that you can achieve whatever you want!
