

Eco-friendly lifestyle

Two thirds of people around the world see climate change as a global emergency. But on an everyday level, what can **you** do to save the planet?

Less plastic!

Stop feeding turtles with your plastic bags. Reuse your coffee cups, shopping bags, packaging... everything that you can.

Recycle!

Paper goes to the paper box. Plastic to other container. Old clothes to H&M or other place like a thirt store that accepts and recycles textile.

Use your legs!

God gave you legs to walk. So use **them**, not your car... That grocery store isn't that far! You can walk there. I believe in you.

Cut off those needless buys!

Do you really need those new sneakers? Better choose something second-handed. I bet you can find beautiful clothes that looks fresh.

Share the word!

If you like eco-friendly lifestyle you can join various organisations and help to share the word. Let's save the planet together!

Save the planet!

For those who still doesn't believe in me...

416 parts per million

This is the concentration of carbon dioxide found in our atmosphere as of May 2020. It is the highest it has been in human history.

2010s = warmest decade

The average global temperatures in 2019 were 0.98°C warmer than the 20th century average. According to NASA, it marks the end of the warmest decade on record.

~50 000

This is the number of species that extinct every year. Approximately 137 species a day.

1.7 of the Earth

If we carry on using the earth's resources at our current rate of consumption, we'd need **1.7 planets** to support the demand on the earth's ecosystems.
