

Dear future students,

My name is Eleonora and I am 17 years old. The reason I am writing is to give you the best advice I can. As you might know, we are currently dealing with many environmental problems the past generation caused. On the other hand, dealing with all these problems, that we came across, we do know and understand the importance of a healthy environment. I do hope that from 30 years now all the environmental problems will end. If something like that happens, please don't make the same mistakes as the past generations and acknowledge the value of mother Earth as it does affect us a lot!
