LAB4S.P.A.C.E. Activity Report Sheet

Name of Activity	LEARINING THE SIGNAL LANGUAGE
Occasion	LAB4S.P.A.C.E. SPAIN March 2017.
Rationale	Communication is the key to the understanding and respect between people. Hearing impaired children can also be able to communicate by using a different code: signal language. Learning it is an opportunity to understand and get on the skin of other people and the same time it is good fun, a part from quite useful in case there are some people with this impair nearby.
Target Group	STUDENTS FROM 8 YEARS.
Content /Issues addressed	An expert teach the students the alphabet and how to construct their names and easy pieces of information.
Aims and Objectives	Learning another language, understanding, respecting, communicating with people that are different.
Methodology / Approaches	Active methodology to learn by imitation a simple code, starting from the most easy step: alphabet, and graduating the difficulty : words and sentences.
Evaluation	Check the succes of the communication . Analyzing the advantages of learning the signal language
Replicability	The activity can be worked by any other group of student of different ages.
Comments	The activity had an important impact in the students making them feel smarter while being able to communicate without using words. At the same time taht they starteded to learn an

	useful code to be able to contact with different people with different abilities and even nationalities.
