

ERASMUS PROJECT : a beautiful experience

Erasmus has been the best project I've ever done at school. It has a very good organization and it is a great opportunity for each student. This year we worked all together to create something very special : a united group of people who work thanks to common interests and objectives. During this three year each student can go to another country (also for a long period) to improve to talk different languages and to discover some interesting things about other cultures. It could be an opportunity to compare different aspects of the daily life with other people. So this project can change you thanks to different activities proposed during the meetings at school.
