Tena:

Yees, bravo, Anja! Another 5 points! Martin, plz tell us something about apples here in Croatia!

Martin:

In Croatia, fruit orchards cover 30,500 hectares, and 5,100 hectares of these are apple orchards. The largest area planted with apple trees is in the eastern county of Osijek-Baranja. This year, it is likely that 55,000 tonnes of apples will be harvested, and the fruit grown in Croatia is of excellent quality. Idared is the most popular apple cultivar in Croatia (33%), Golden Delicious follows with 13%, while Jonagold ranks third, 9%, Gala is fourth with 7% share, and Granny Smith has a 5% share, whereas all other varieties account for 35% of production.

Old sorts do not always look as the first-class fruit [29], but they are distinguished by their different fullness of taste and especially expressed aroma. Old cultivars are: 'Roter Pogatscher' ('Božićnica'), 'Blumen Calvill' Grafenštajnska', 'Großer Rheinischer Bohnapfel' ('Bobovec'), 'Grüner Stettiner' ('Zeleni štetinec'), 'Weißer Winterkalvill' ('Bijeli zimski kalvil'), 'London Pippin' ('London peping'),

'Yellow Bellflower' ('Lijepocvjetka'), and 'Reinette de Champagne' ('Šampanjka') The varieties Zimnjara, Lještarka and Adamova zvijezda are also traditional.

Tena:

Thank you, Martin! Let us see the points! Oooo, my god! Juraj, what is this? Who is the winner? Everybody? Ok, Thank you, Juraj!

The jury decided we are all winners so there is an apple for each of you!
