

“The Future Begins Today”

Project KA229 2018-1-PL01-KA229-050749

Italian students at work

I made a real internship and improved my qualities in the workplace which will be useful for my future. From this experience I learned several new things like: the truthfulness of materials that I will need for my work, the various, getting my hands on my first home installation.. Giuseppe Piscionieri

Photo

In this image, together with my employer we were mounting an electrical wiring of a sensor-operated electric gate

In this other picture we were engaged in mounting some sockets and later as you can see from the picture we finished by passing the cables in the ceiling.

I worked with a Building company.

With my group, which was part of the CAT department, we worked in some containers to be shipped to England. Moreover I attended a technical English course.

Andrea Rosanò

DEVELOPMENT OF A SURVEY CONCERNING SOME GARAGES WITH THE USE OF ROLLER AND ELECTRICAL METER. DRAWING OF THE PLANT ON PAPER AND THEN BRINGING IT BACK TO AUTOCAD.

SURVEY INSIDE A BURNED BUILDING.

This experience revealed to be really important for my own development both as a person and as a worker. Being in contact with a real work world is determinant in order to make me perceive my real potentialities.

Domenico Frascà
