DISSEMINATION ACTIVITIES FOR SOVERATO ONLINE MOBILITY

The last mobility to Soverato was done in online format because of pandemic restrictions.

Students of the partner countries could see each other again and share their experiences during the last months. They explained how the centre had adapted its day to day activities and organization to keep on going.

They completed tasks which had been planned for this mobility during that week by means of school technological equipment.

All this was explained to parents in the beginning of September meetings and posted on the school website.

They also watched “**Dreams come true**” movie and “**Best moments of our project**” together, which was shown to parents to enjoy as well.
