

Catalan Students' report on their online mobility to Soverato:

During this week I feel a lot of different things. It was quite weird to do a mobility online, but I was glad to do it despite it was by Internet. First, I missed all the feelings and all the experiences that you really have during a physical mobility. Also, I saw all the other students and I remembered all the good memories that I have with all of them. After that, all the activities that we did were good, we learned a lot of new things and the best was that we laughed and we had a really good time. Obviously, I would like to do all those activities in person and see all of them face to face just for the last time. Anyway, I won't forget all that Erasmus project, because I made a lot of new friends and I will remember them for the rest of my life. In the end, this last "mobility" was a good idea to finally close that project and close something that we all had built. I really loved watching that memories' video about all the mobilities of that Erasmus and I hope that we can see all of us soon!
