<p><u>Content</u> (what do you need to play?)</p>	<p>To play, we need:</p> <ul style="list-style-type: none">★ 4 tiles to start★ 4 castles in 3D★ 48 dominos★ 8 wood kings  <p>The image shows the Kingdomino game components, including the game box, several wooden castles, and a set of colorful dominoes.</p>

Rules (explain the different steps)

- Choose a colorful king.
- Mix kings in the hands and arrange them on the four returned cards we do not see the landscape side.
- Put the cards in ascending order.
- After taking the card and putting tile, put four more cards on the table (not in the same way as earlier).
- The player whose pawn is on the card with smallest number, has the right to choose, cards can have crowns and these determine the value of your empire.
- The game is played in the same way as a domino however we can accumulate only 5 looses by direction.

How does the game end?

- ❖ A domain without crowns yields nothing.
- ❖ Each player adds the points reported by each of his domains, the result of this addition gives him his final score.

- ❖ Whoever has the most points wins.
- ❖ **Warning!** : for 2 players, remove 24 dominoes at random and play with the remaining, for 3 players, remove 12 dominoes at random and

***play with the remaining 36 and for 4 players,
use all dominoes.***

Assessment (What did you like? What didn't you like? Why?)

Before to play, we needed a little time to understand the principale of this game because it isn't the easiest of all !

This is the inconvenience !

But this game was so interesting because we had to choose the best strategy to win !

Actually, we prefer strategy games than games of chance !
