

SAVE THE PLANET!

WHAT CAN I DO ?

Primary School „Vuk Stefanovic Karadzic“, Kragujevac,
SERBIA

The goal is for children to become responsible at the earliest age and to contribute to the protection of the environment through personal actions, for example daily behavior and attitude towards energy consumption, thus becoming conscientious citizens.

WHAT CAN I DO ?

HOW TO SAVE ENERGY?

Children should "fight against bad habits" together with their parents, trying to involve the whole family.

IN THE HOUSE

- Lower energy consumption for heating apartments (19 ° C, is quite enough).
- In winter, even in the apartment you should wear a sweater, it is a luxury to be in a T-shirt with short sleeves!
- In winter, in the evening, lower the blinds and draw the curtains to maintain the temperature in the room during the night.
- Turn off appliances that you do not use (lighting, computer, music line printer, etc.).
- Shorten the time you spend in front of screens (television, game consoles, computer).
- Use energy-saving light bulbs.
- Use a shower instead of a bath.

IN TRANSPORT

- Go to school on foot or by bike.
That's healthy! And it can be fun!
- Do not use the car especially if
you are alone or for short
distances.
- Use public transport.

WHEN YOU ARE SHOPPING

Buy seasonal fruits and vegetables.

Prefer local products.

Waste is actually everywhere around us...And we certainly do not want that...

-No matter where we are, at school, at home, in the park, we always have to think how to protect our planet from waste ...

-The waste remains on the ground. It does not dissolve quickly, but it takes many years.

-During that time, it disturbs plants and animals.

-It disturbs us, too!

Reduce

Reuse

Recycle
