

PLANNING ERASMUS + PROJECT 2020-21

Students from all the courses of Elexalde school will participate.

The aim is to open the project to the whole school and make them aware of the Greek culture, so we will work it in the English department with all the levels.

At the same time, students will discover the Greek culture, reading all the information from the blog, preparing activities about it and sharing it with Katerini students.

We have chosen some activities from the Project done by Greek students and they will design activities related to it.

They will be uploaded on the blog, e Twinning Instagram and mobility tool and European platform.

1 DBH After reading the book of Greek Mythology. They will create digital stories through story jumper. Upload them on the blog, e Twinning, Instagram.

2 DBH Google maps of the Greek sites Elexalde students visited in the Exchange.

3 DBH Students will prepare Greece recipes and video them.

4 DBH Kahoots related to some topics of the Project (dances, sport, food, musical instruments)

At the same time we will finish the two activities which couldn't be completed last year.

-The historical heritage of Galdakao town

-and the Maritime heritage.

-The historical heritage of Galdakao will be done by 4 DBH students.

The history teacher did the tour through the history of our town Galdakao and with it, students will design a virtual tour with all the explanations given by him.

-Some students of 4 of DBH volunteers will also create a video of Bilbao step by step if Greek students come in order to guide them through Bilbao.

-The Maritime heritage has been postponed by now because we are not allowed school trips

We will organise the activity of Portugalete Hanging Bridge instead.

And we will wait for the activity. In case it won't be possible to do it, we will change it.

Students 1 Batx

The diaries of the C4 mobility and videos for Greek families.
