Dear Erasmus student,

I would like to introduce myself starting by me. I'm 13, I hope to be an anaesthesiologist. I like school, my marks are perfect and for now my life is doing all right. This is my family: I have a sister (an annoying one), a mom, a step-brother, which is twice my age and unfortunately a dead father. My hobbies are: videogames, tennis and being on my phone. The sports I like are tennis and soccer, the ones I dislike are volleyball and judo, but I practice it three times a week, since my mom wants me to. I like videogames, the sea and dark humor but I dislike sports (not all of them) and drawing difficult things. I don't have any pets. I also enjoy travelling very much. I have been to Cyprus, Montenegro, Greece, Bosnia, Croatia, Malta and Italy. When I was little, my mom told me that I would love if she would count from 1 to 10. I asked her to repeat it when she finished. That's why I think my favorite subject is maths. Oh, I also have the same birthday as Queen Elizabeth (21st April).

That's my life,
Martin
