## Revenge

This is the story of a spider called Timmy. Timmy was very small and sweet. He had red eyes and tiny legs. But there was something strange in Timmy's life – He lived in a lab for medical experiments, because he had been kidnapped by a mean Snowman from Snowland. There were a lot of chemical materials and potions there. Timmy missed his home and his family back in Spider Village where he came from.

Snowland was big and isolated. The snowmen population were small, fat and bad. They had small eyes, big carrot noses, and arms made of branches.

One night, one experiment didn't go well: little Timmy turned into an enormous spider! It was really huge, terrifying and strong. He rebelled against the snowman, because he had been imprisoned for such a long time in the lab. He destroyed the lab and ran away ...

Timmy was so angry! There was only one word ringing loud in his head: **destruction**! He climbed the best monument in Snowland, a big shiny clock named Carrot, which was right in the town centre. Soon after, Timmy had destroyed most of the town. He was out of control and so he continued destroying everything he saw: Hospitals, shops, schools, flats everything!

A snowman who was reading the paper in a cafe, saw the huge spider through the window, hid under the table and immediately phoned the most important doctor in town, Doctor Steve.

Doctor Steve was small and thin. He was completely **mad** but he knew everything about the crazy experiments they did in the lab. He was the only person who knew the formula for the antidote to make Timmy normal again. He looked at his **watch**. There was still time to go to the chemist's! He ran as fast as he could, bought 2 bottles of medicine and a box of pills, made the secret antidote and rushed back to where Timmy was. Luckily, he had a bow and arrow in the boot of the car, and that's what he used to hit Timmy with the medicine. The result was immediate! Timmy shrunk back to his normal size and became his natural sweet self! Everybody cheered and clapped. The lab was shut and the mean Snowman taken to prison.

From that day on, cruel lab experiments were abolished and Timmy lived happily ever after.
