

My school, my life ❤️

2018 - 2020

Batea, February 2019

OUR SCHOOL

CHARACTERISTICS of Secondary school:

We are 250 students from 3 to 16 years old and soon from 0 to 16 years old because a nursery school is being built. Our school is a pilot school which will include this, students from 0 to 16.

The subjects in ESO are:

- Catalan
 - Culture
 - German
 - I. T
 - Spanish
 - Technology
 - Latin
 - Art
 - Maths
 - Religion
 - P.E
 - Music
 - English
 - Project
 - Entrepreneurship
 - Biology and Chemistry
 - Natural science
 - Social science (Geography and History)
- 

ERASMUS CLASS

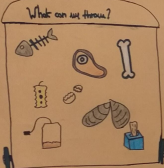

In Erasmus class we learn foreign languages (English and German) and project.

NEUS CATALÀ CLASS

Organic Waste

What can we throw?

Reasons for recycling:

- We have to recycle organic waste because then we can make compost.
- We have to throw the organic waste in the container because if we throw it in the open we contaminate.

Colors of the containers

How to make compost?

To make compost we need organic things like: dish, meat, or shells...

First we have to mix all the organic waste with peat and water.

Then we need to wait one month, because the compost has to be mature.

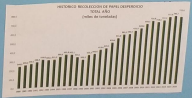

After this period of time all the materials are mixed and they are ready to use.

WHY DO WE HAVE TO RECYCLE PAPER

- Reasons for recycling paper.**
 - Recycling paper saves natural resources, saves energy, reduces greenhouse gas emissions, and keeps pollutants out of the air.
 - Recycling one tonne of paper can save about 172 trees, 76,500 litres of water, 1,400 litres of oil, 3 cubic metres of landfill space and 4,000 kilowatts of energy.
- The importance of conserving our forests.**
 - The trees are called the lungs of the earth because they give us oxygen.
 - The trees take the CO₂ at night and from that they make oxygen, we need the forest to clean all the CO₂ that we produce everyday.
- Paper and cardboard CONTAINER**

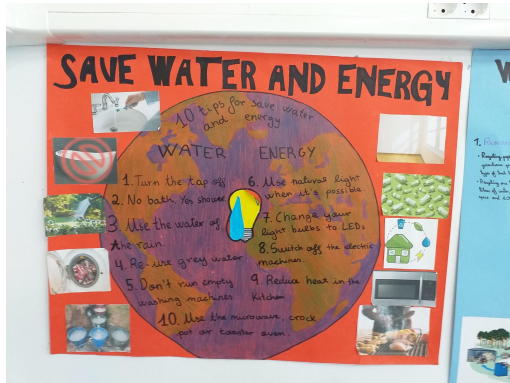

YES	NO

NEUS CATALÀ CLASS

In Neus Català class we learn Social science (Geography and History) and project.

ANTON AUBANELL CLASS

In Anton Aubanell class we learn Maths and science.

J. MANUEL SERRAT CLASS

In J. Manuel Serrat class we learn Catalan, Spanish and project.

They are our mother tongues.

STEVE JOBS CLASS

In Steve Jobs class we learn art, project and natural science.

LAB AND WORKSHOP

Sometimes we learn Natural science in the Lab. Sometimes we go to the Lab and we do experiments.

We do technology and art lessons in the workshop. When we do technology we make practical things like robots or models, etc. When we do art we use the workshop to make bigger works of art, for example, a representation of Frankenstein monster for our Cultural Week.
