

Activity A11 Crayons

Pupils become producers of their simple visual production in school. They take photos of everyday objects in different ways following directions. They take photos of the item: “as we usually see it”, “as an element of social interaction”, “as a hero of a children’s fairy tale”, “as the object of an advertisement campaign”.

1. An item “*as we usually see it*” – The Crayons

2. The item ***“as an element of social interaction”***

We can draw and spend time with our friends. This gives us an opportunity to ‘chat’ and cooperate, we can share our ideas and know each other. These moments we love very much.

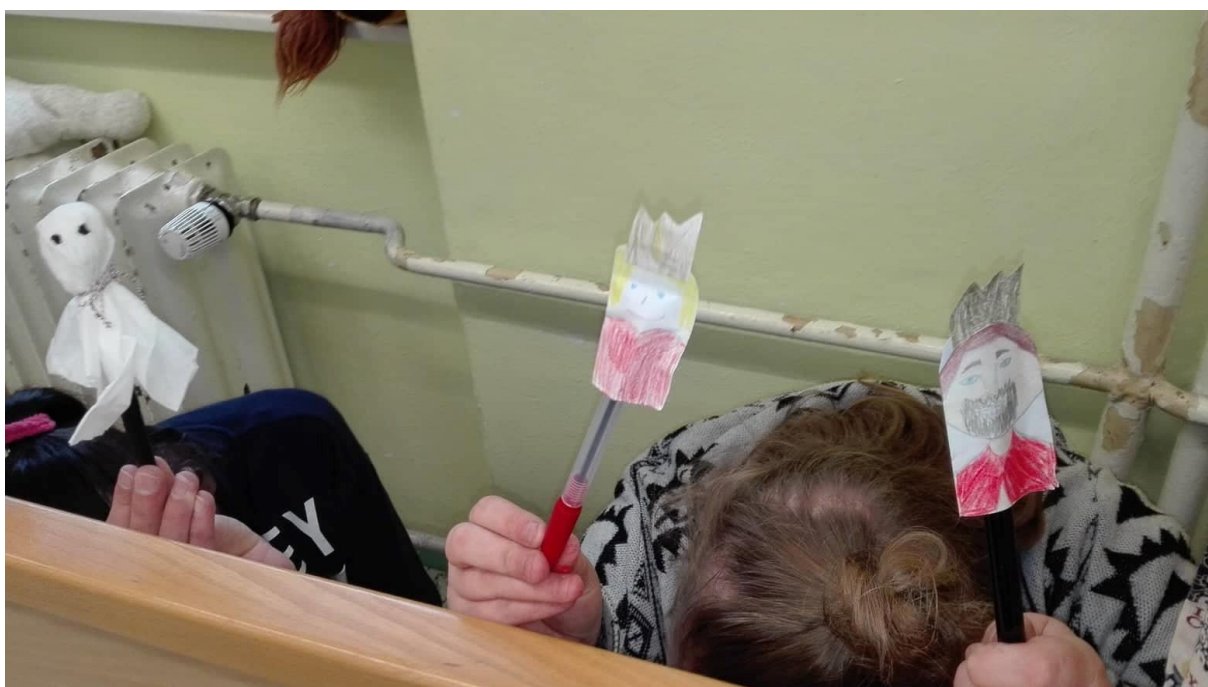

3. The item as ***“we would have never seen it”***

a) Our girls have sometimes used crayons as unusual hair decoration. It is quite funny.

b) We used the crayons as theatre puppets.

4. The item *“as the object of “advertisement campaign”*
