Erasmus+

## C.C.A. Climate Change Awareness

Climate change affects us all. We must begin to take action in order to save our planet, our home.

Currently, Europe's air quality is mostly 'fair.' There are still some areas that register as poor or very poor. Ideally, all of our air should be better than good.

Things we can do in our everyday life to make an impact on the air quality:

- start using bikes and electric scooters
- we could also start recycling everything to help
- saving energy by turning off lights and turning off water
