

How can you prevent air pollution?

ERASMUS+ CLIMATE CHANGE AWARENESS
CCA CLEAN AIR CAMPAIGN 2021

What are the causes of air pollution?

- Extraction of energy sources
- Traffic and not eco-friendly transports
- Uncontrollable industrialization
- Expanding big cities suburbs
- Agriculture using poisons
- Home-heating
- Wrong waste management

What are the effects of air pollution?

- Smog, greenhouse effect and acid rain
- Deterioration of fields
- Respiratory health problems
- Climate change
- Extinction of animal species

What can you do to help?

- Use public transportation instead of a car
- Avoid using plastic
- Make sure to recycle the waste you produce
- If you can, support the climate change activism or projects
- Consider switching (or convincing your parents) to renewable power sources like photovoltaic panels
- Use energy efficient electronics
