1. Teacher:

- o Collaborates with the students to create interest and motivate them to learn
- o Effectively uses techniques that recall students' experiences and background knowledge

Yes because the teacher shows them a picture with the logos of the social networks and makes them think about which ones they use and for how long. This appeals to their need to share their experiences.

2. Students activities indicate that the tasks, explanations, and questions of the teacher are understandable to the students.

Yes, students promptly and effectively performed the tasks suggested by the teacher.

3. The teacher is targeted to use various forms of work, methods, strategies.

Yes, the teacher first interacted with the students, the students viewed a video and had to interpret it. They had to share / give feedback as to their full understanding of the video. Students had the chance to discuss.

4. The teacher provides the opportunity for the pupils: their interpretations.

- o Ask questions;
- o Analyze and explain;
- o Perform experiments;
- o Obtain information, also using the e-environment;
- o Collaborate;

students were constantly interacting with the teacher and with each other. They obtained part of the tasks from a video on Youtube.

5. All the students are involved in the learning process

Yes, especially because the teacher (made) asked questions to all the students, involving the ones who didn't voluntarily participate in the class discussion.

6. Lessons feedback is provided by:
