

You can touch it,
feel it, smell it,
see it.

Created by
computers.

It doesn't exist in a
real life.

Created to exist in the
computer software.
Made to appear.

Something existing or
happening.

REAL AND VIRTUAL

You can speak to it.
Made by electrons,
neutrons...

Simulated by a
computer, doesn't
have emotions.

It is living,
breathing.

False and
artificial
Reflection of the
real.
