

VIRTUAL AND REAL GAME... – WHERE IS THE DIFFERENCE?

Real game

- You can touch things (controller...)
- Play with friends and speak with us.
- It's more fun
- Real games help us to cut with virtual connexion.

Virtual game

- We feel like we are in the game.
- The sensations can be stronger than in the real.
- We do not realize space and time.

You can play
with friends.

You can enjoy
and have fun.

You can interact
with people that
are closer.

Conclusion : We prefer real games.

Real
game

Virtual
game

You used to
play by your own.

You can enjoy and
have fun.

~~You don't have to
tidy up.~~ You can interact
with people but you can't
see them.

there are less
violent games

- we can play
together and we
can see and speak
to each other

more ^{physical} contact
with the players

REAL
GAME

Virtual
Game

we can't talk with each other
without a headset

we can't share our emotions,
like laughing or crying

we can do things that
in real life we can't imagine
to do.
