Teaching Thoughtfully with (and without) Technology

This article was originally published in the Fall 2000 issue of the CFT's newsletter, *Teaching Forum*.

By John Rakestraw

The first time I entered a university classroom as an instructor, I carried a wealth of classroom experience with me. I had spent many years as a student, and during that time I had observed many different teachers do many different things to enable (and sometimes stand in the way of) the learning of their students. As a beginning teacher I didn't think very carefully about all of these experiences, but many of the things I did as an instructor in those early years drew on my experiences as a student.

To pick one simple example, when I approached a chalkboard to illustrate a point on my first day of class as an instructor I had behind me years of many teachers using the chalkboard in a variety of ways. Some of them

Tablets out, imagination in: the schools that shun technology

Parents working in Silicon Valley are sending their children to a school where there's not a computer in sight - and they're not alone

▲ Silicon Valley in California is America's digital centre, but the Waldorf school of the Peninsula located there shies away from using technology in the classroom. Photograph: Corbis
