The parts of a computer

I. – Introductory information

Title: Parts of a Computer
Subject: Information Technology
Author: Yeter Akbulut Uzun
Age: 13 - 15

II. - Aims

Lesson aim:

- at the end of the lesson the learners will be able to recognize the main parts of a computer with the help of authentic materials.

Language aim:

- at the end of the lesson the learners will be able to differentiate the pronunciation of some certain words about the computer.

III. – strategy, material used

Learning strategies

- cooperative learning

Material used

-a computer, handouts, board, boardmarker

Lesson plan

Introduction:

- to activate the schemata of the students about the computer, the teacher asks how they communicate with their friends. The teacher gets the “e-mail” answer or “social media”. Then, the teacher asks what they need to send an e-mail or use social media. The teacher gets “a computer” answer.

Warm up:

- After eliciting the answer, the teacher asks the students to brainstorm about the parts of a computer. The teacher draws a mind map on the board about the parts of a computer and notes what the students have already known.

Presentation:

-the teacher sticks the pieces of a paper which s/he has prepared beforehand on the computer. Then, s/he introduces the new vocabulary items by showing on a real computer.

Practice:

In the first activity, the teacher asks the students to find the missing letters to complete the vocabulary items about the parts of the computer.

In the second activity, the students match the sentences with the right words.

Production:

The teacher divides the class into two groups and asks them to play hot seat game by using learnt vocabulary items.

Wrap up:

The teacher asks the question “What have you learnt today?”
