

BERNARDÍ TOLRÀ SCHOOL (CATALONIA-SPAIN)
LESSON PLAN RECYCLING

GRADE	6th grade
TIME DURATION	90 minutes
UNIT	CLIMATE CHANGE
TOPIC	RECYCLING
GOALS	<ul style="list-style-type: none">- Learn about the material cycle.- Learn about different process of manufacturing- Learn the recycling process and the 4R's
VALUES & FUNCTIONS	<ul style="list-style-type: none">- Value the human effect towards the pollution.- Learn what we can do about recycling.
METHODS & TECHNIQUES	Key vocabulary Classification Writing
MATERIALS	Recycling game, videos, the class bins
WARM-UP	Video about a dumping site
DURING THE LESSON	After the video, students see that everything goes to the dumping site and they have to think about what they can do. They learn about the 4R's. They play a game where they have to throw each waste to the correct bin. Each student writes an agreement to their families in order to recycle correctly at home.
EVALUATION	Evaluation rubric.
