

My dream

Now I will talk about my own dream... .. I had it on the day when the ERASMUS boys from Greece, Latvia, Poland and Spain were to arrive when they warned us that they could not come.

A few days passed and we students of ERASMUS, with the teachers, thought that perhaps it was possible to re schedule the event to a new date. But this did not happen: the virus had spread worldwide had definitively cancelled the arrival of our international mates.

I already had in mind the welcome day film and the meeting of those guys I met a year ago. But the bad news prevented the dream from being realized. We ERASMUS students and teachers are a united and strong group that also faces this difficulty and my dream ended with the image of us united by the hand that we were waiting for the plane of our international mates to land at Pisa airport.

After having this dream I came up with the idea of making a beautiful drawing that represents our ERASMUS group.

This is my drawing that represents : in the background the flag of Europe , with the flag of Italy, Greece , Poland , Spain and Latvia. They are united with a plant called laurel. Here in this drawing I meant to represent “ in my own way “ all of us.

With love to you all

Arianna Natali
