

"Culture connects our hearts"

It's real, culture can connect our hearts!
The culture is amazing!
Culture is different in other countries and this makes it special!

What is culture?

Culture is the social behavior and norms found in human societies, for example, art, music, dance, religion, gastronomy and other things...

Why culture can connect our hearts?

Culture can connect our hearts because it is different. For example, I like African culture, why? Because I love African music, I like the idea of having tribes, I like the gastronomy, basically I like the African culture, and for that I like African people, so culture can connect our hearts!

Why culture can connects our hearts?

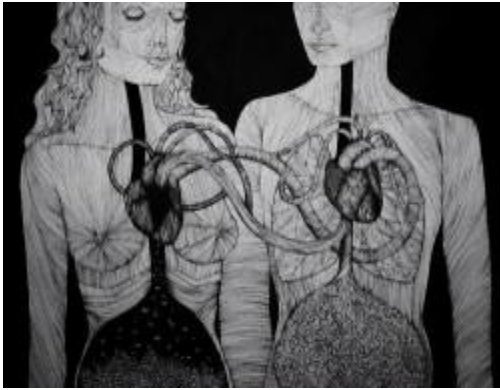

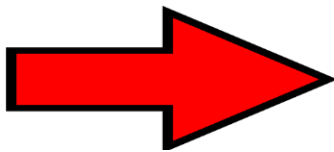

Another example was the catastrophe that happened to the cathedral of Notre Dame. People gathered to help France and the cathedral, this event was a way to bring people closer, that is, connecting their hearts, because as the cathedral as part of French culture managed to make people from different regions / nationalities come together and helped together.
