CLEAN WATER

WATER

HELP OUR HEALTH

IS ESSENTIAL FOR HUMAN LIFE

HOW TO CLEAN THE WATER

Fatal medical conditions like cholera, typhoid, and hepatitis A all happen because of the consumption and/or the presence of contaminated water.

How help us to stay safe?

Why is so important?

Water is an essential resource for the humanity. A normal person requires 20-50 liters of clean water, for drinking, cooking etc... Polluted water isn't only dirty, is deadly...
