Future Trends in Clothing (FTC): Trendy, Smart and Healthy?

Dear students,

Below you find the most important information related to your work in one of the three prototype teams until the next meeting in Karditsa. You can find this information in your prototype course, too.

1. **Duration** of your work: From February till 21st of October 2019
2. **Tasks** you all have to do until Mid-October:
 - a. Do and use the result of a marketing research (QN)
 - b. Draw conclusions and consequences for your prototype idea from the results.
 - c. Try to organize within your prototype team as efficiently as possible:
 - Communicate with each other and stay in contact
 - Divide tasks (e.g. solving open questions, technical problems, adapting the project plan, creating sketches and discussing them) among each other.
 - Choose one member of your team who reports back to the teacher about HOW you divided the tasks.
 - Take notes on all these decisions and have them ready to show!
 - Use the info on product policy that you get in September for your prototype idea

Students who will participate in Karditsa:

- Your prototype team prepares one presentation on the experiences and steps you took during your work in the prototype team.
- If possible: each prototype team brings a realization /model of your prototype idea or well-made sketches with them to the meeting.

3. If you need any **help**, please ...

- Contact the administrator of your moodle course, if you have technical questions to moodle.
- Contact the following teacher in your school, if you have a question related to:
 - project management and marketing: Mr. Karner (Austria)
 - research and general content issues: Mrs Maimani (Greece)
 - IT and electronics: Mr. Hidalgo (Spain)
 - tailoring and manufacturing: Mrs. Aschenbach (Germany)
