

## BBE Project - Fifth Meeting Report 15 April 2021

At 8:30 a.m. on TEAMS platform

Participants:

Italy: Franca Liuzzo, Rosanna Vigliocco and Simonetta Ponziano

Croatia: Ivana Vrdoljak

Romania: Silvia Ungureanu, Ioana Roxana Ciuca

Estonia: Anna Ignatjeva

- 1) Regular uploading on Etwinning
- 2) Wakelet
- 3) Common activities
- 4) First mobility

1) Franca recommends a regular upload of pupils' work on Etwinning materials and pages where she has created an index of topics to be documented and explored.

2) Ivana communicates that she has just prepared a link to use Wakelet on gmail so that there will be no problem uploading new material: the films are not directly on Etwinning and, therefore, there is no need to worry about the copyright of background music.

3) Franca suggests common online activities on different topics:

copyright

netiquette

e-safety

and the creation of a multilingual dictionary (Italian, Romanian, English, Croatian, and Estonian).

2 students of each school for each group will work online during a 90 minutes meeting to decide what information to pick up from the different material loaded on wakelet to create a final document which will then be published on E-twinning as a common activity.

During the meeting Silvia sends the link to a dictionary already made by other partners on WhatsApp as an inspiration to follow: this is exactly what Franca had in mind!

The topics to develop will be:

greetings

meals

ingredients

numbers

common expressions.

The majority of the participants do not approve of the topic "school" which is therefore left out.

Rosanna asks to add the topic "TRADITIONS".

Ivana suggests the use of "Bookcreator".

4) Franca launches the idea of organising the first mobility for the end of September in Romania since, according to last year's experience, Covid should be less virulent at that time than during the rest of the year. Everybody approves. Rosanna asks about transport and accommodation. Silvia explains that she can organise bus transport from Bucharest airport and that the school has a campus, which makes things much easier. Franca adds that the topic to be developed on the spot will be: how to start a "start-up", remembering to also invite local entrepreneurs who will share their experiences and will be interviewed by the students.
