

Dear parents and pupils,
Esteemed colleagues and guests,

Since September 2016, "Constantin Noica" High School Sibiu will be involved for two years in a European project of strategic partnership that aims to support the development, transfer and implementation of innovative practices and joint initiatives in order to promote, cooperate, learn mutually and to exchange of experience at European level.

This project (entitled "Ecological Literacy") will be conducted by our high school team with the support of the European Commission, within the Erasmus+ Programme, and we will have as partners schools from Turkey, Portugal, Cyprus, Lithuania and Croatia.

I have to say, as coordinator, that all information we provide is the sole responsibility of the project team in "Constantin Noica" High School Sibiu and the National Agency for Community Programmes in Education and in Vocational Training and the European Commission are not responsible for how the content of this information is used.

The activities included in this project will be presented on a specially created page on the high school website, on the project website and in our high school magazine. The purpose of the events prepared by our pupils (seminars and workshops on environmental issues, drawing contests, photo exhibitions, artistical performances, publishing of brochures, documentary visits to recycling plants or hothouses) is that of attracting public attention on environmental problems having as target their awareness and sharing knowledge on how to conserve limited natural resources.

By this first Erasmus+ project implemented by our high school, the pupils (from the preparatory class to the class XII) have the chance to show others the beauty of their personality, putting in value their qualities and hobbies, care for the cleanliness of the environment in which they live and learn, proving thus their friendship and the European appartenance. In the conducting of these activities, we are confident that we will benefit from the permanent support of the school inspectorate, of local authorities, of regional environmental institutions and of the Association of Parents.

We hope that this project will be an incentive to all teachers in our city to start Erasmus+ projects, contributing to continuous training of teachers and to the strengthening of the European dimension in the education of the pupils in Sibiu County by cooperative activities between schools.

Project coordinator:
teacher for primary level Gabriela Mirela Jugar
