

The Mobility from Romania and the Smile on the Partners' Face

It was a week full of excitement, fun, laughter and cheerfulness on the faces of all the foreign pupils “Constantin Noica” High School Sibiu had as guests. It was great that they liked Romania, that they would have liked to stay more, and that we understood each other as brothers.

I had fun with all our partners. The days of that week have really passed very fast. We all became very united. Even the Romanians among us. I am sorry that only in Lithuania will be the last mobility, and after that, the Erasmus+ meetings between pupils will end, as I would have wanted to meet again and to feel well together. European friendship between pupils is wonderful.

The third mobility spent by all of us in the second week of October month 2017, was an amazing one. We have learned a lot of things about the protection of the environment during many study visits and the workshops in which we showed how hardworking we are. We had fun, played and spent lovely evenings together the guests in family. It was a great pleasure for me and my family to host a nice and polite girl, with whom I will keep in touch. I would like to take part in other Erasmus+ projects with the same coordinator, who knows to make us happy to work in a European project.

I am also so grateful to my parents who understood altogether the role of Erasmus+ projects in the school life and its importance for my education.
