

Report about our trip in Barcelone with our Erasmus' penfriends

Our Erasmus catalonian penfriends received us in their school last june with some Danish pupils and English, irish and Danish teachers. Some pupils made us a presentation of their school Maristes Valldemia : it is hudge school ! Pupils are between 3 and 18 years old. They have their own gymnasium and a little garden.

Then, we made a Eurovision competition : each country has sung his own song during a videoconference. Then, they voted for the best one !

After that, some children, still by videoconference, have presented their favorite book to another penfriend. Each country offered some presents to each other like some drawings or bookmarks, it was a good sharing moment !

Another day, we visited a scientific museum called "**Museo Cosmo Caixa**" It was a interactive museum, very interesting. One part of the museum explained us the smooth running of our ecosystem in a full size !

To end it up, we walked around Barcelone and discovered the Gaudi's wonderful buildings. The pupils finished their stay doing some yoga and games.
