

Reunion island

A trip to Reunion Island to 27-11 to 03-12 !

we were in a hurry to arrive...eleven hours of flights

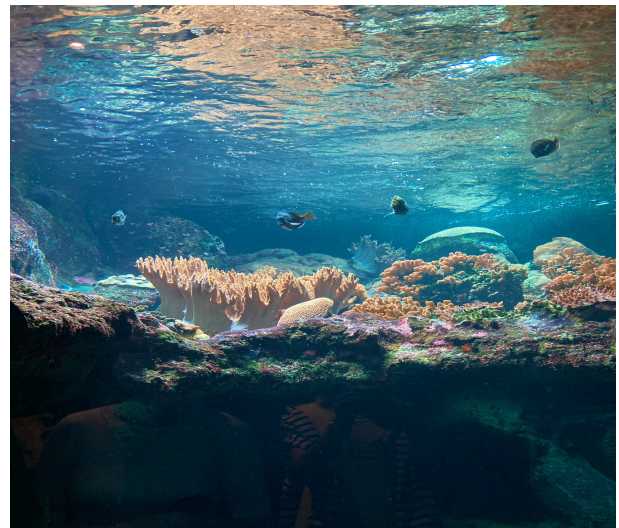

airport (change of clothes)

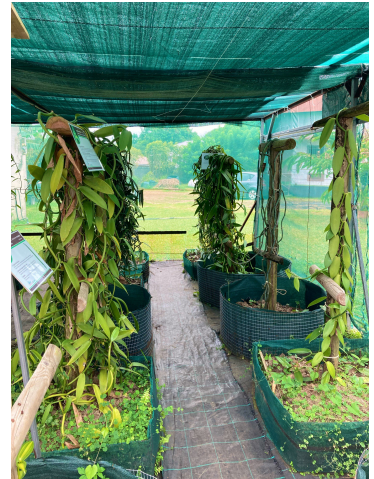

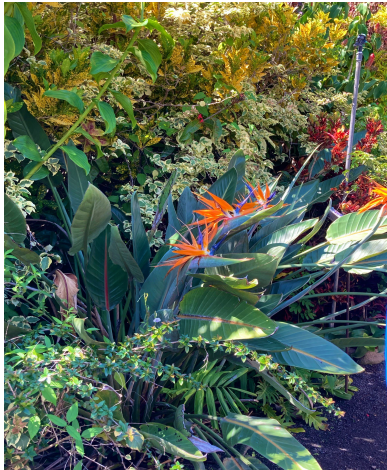

We traveled with the company french bee from Paris only to Reunion Island, we were four students from the european section and two professors. (Gibelin and Malliarakis)

I had the opportunity to have a family that made me discover the meals and the beautiful landscapes they have at home.

Every day we visited this island and discovered new landscapes, like the beautiful nature that surrounds this island, the Indian Ocean where we did scuba diving in front of the coral reef.

Rainy season, take your k-way but take your sunscreen because...

31° every day, in the rain and in the sun it's the same temperature it's great !!

VS

We had great times together and our photos are magical, but... the most magical thing in history is the chance we had and the trust our two teachers shared with us. I would like to thank all the people who organized this trip and also my teachers.

Thank you !
