

## REPORT OF THE TRIP TO REUNION ISLAND

I really enjoyed the trip to Reunion because I was able to learn and discover many things. First of all on the first day when we arrived on the island we met with the host families who were going to host us during the stay. We were impatient to meeting the families as well as the Spanish and Romanian students despite the language barrier. The second day we went to visit a vanilla plantation (vanillery). This visit was good because before this visit I didn't know how to Vanilla plantations were functioning. Now I realize that it takes a lot of time before you can sell a vanilla bean (6 years).

The third day we went to a botanical garden "Domaine du café grillé". This visit permit us to see exotic plants that I had never seen.

Then we went to the lagoon. It was great because we saw a lot of fish.

On Wednesday we did the oral. We were a little stressed but in the end all is well pass.

Thursday we went to see the Piton de la Fournaise and its museum.

I have learned a lot of things about the volcano and the creation of the island. Then we did a college meals. This party was great because I was able to speak in English and Spanish with the Romanian and Spanish pupils.

On Friday, all the six visited the island with a guide who explained to us the history of Reunion with anecdotes.

This trip was great because I saw landscapes, plants, fish and a lot of other things that I never would have seen without this trip.
