

# The Basilica of San Vitale

Di Lorenzo M, Simone C, Malak S, Laura F.

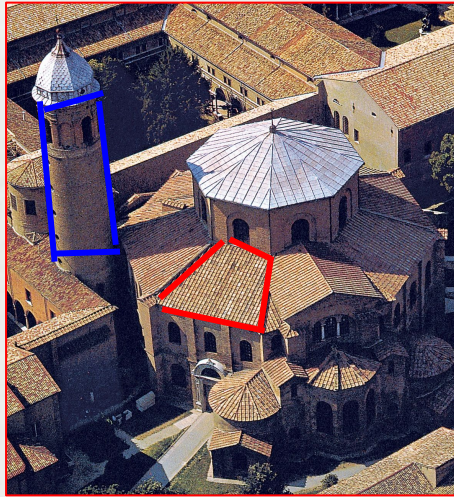

# The Story

The basilica of San Vitale is one of the most famous and important Catholic places of worship in Ravenna, whose construction began in 532 D.C and ended in 547 D.C, an exemplary masterpiece of early Christian and Byzantine art. In October 1960, Pope John XXIII elevated it to the dignity of a minor basilica.

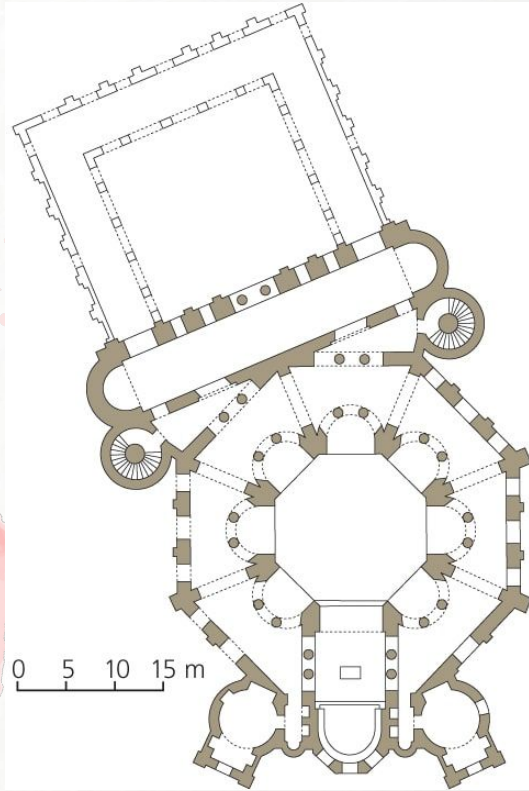

# The geometry Pictures plane we see

In this monument we see <<a  
:rectangle,rectangle, right  
triangle, trapezoid and  
cylinder

# Geometry solid

the peculiarity of the structure is that there are many octagonal base prisms and cylinders
