### A Breakfast with an Entrepreneur

According to the project's plan the Italian team, in occasion of the activities related to "Orientation Days", organized a breakfast with a successful entrepreneur whose skills in video editing are well known. Students were invited to act in a movie to encourage other students to attend our school. They were illustrated the techniques, the modalities of laying the script out, the difficulties encountered in achieving success in this field. They realized the importance of efficiently promoting themselves.

And at the end they had a deserved breakfast
