Physical and chemical changes in matter

Physical changes

Chemical changes

Spain's population

Age

Location

Everything around us, both living and non living is made up of matter. There are three different states of matter: solid, liquid and gas. In a physical change, the appearance of the matter changes but its chemical properties are still the same. In a chemical change, a new substance is formed and this new substance has different chemical properties from the original substance.

Macmillan Natural and Social Science 5

Macmillan Natural and Social Science 5

Big Writer of the week

Handwritten student work with illustrations of a pencil character and trees.

Do you eat a healthy balanced diet from these 5 food groups?

fruits and vegetables
vitamins and minerals

bread and cereals
carbohydrate

meat and fish
proteins

sugary foods
fats

milk and dairy
calcium

A collage of food items categorized into five groups: fruits and vegetables, bread and cereals, meat and fish, sugary foods, and milk and dairy. Each group is represented by a central label and surrounded by small images of various food products.

CADIZ 1812-2012 VIVA "LA PERA" CONSTITUCION

A commemorative display for the bicentennial of the Constitution of Cádiz (1812-2012). It features a central banner with the text "VIVA 'LA PERA' CONSTITUCION" and "CADIZ 1812-2012". The display is decorated with numerous small framed images, text boxes, and illustrations, including a figure of a person and various historical scenes.
