

## **Kristronics – Innovation meets quality**

a.) „Engineering electronic manufacturing services“ - Kristronics offers the development and production of modern and complex control units. For example: Customers of the automobile industry needs some control units for their new sportscar. Now the Kristronics engineers plan, develop and produce the devices the customer needs, in the most cases circuit boards.

b.) Kristronics is a service contractor and producer of circuit boards for different segments, e.g.:

- Embedded Systems
- Ultra Low Power
- Industry Applications
- Power Electronics
- Medical and Life Science
- Automotive Vehicle
- Smart Sensing
- Safety Technology
- HV e-mobility

c.) Kristronics is a business of the legal structure “GmbH”.

The founder of this business was the danish businessman Kristensen. Ten years ago the 'Master of Business Administration' (MBA) Thormod Ohm took the company over and named it to the todays name, Kristronics.

The company structures has many layers. On the top is the Chief Executive Officer (CEO) Mr. Ohm. There's also a marketing department, a personal department and a administration department. The development and design department are very important. Finally there's a production department.

Kristronics has only one location of industry in Harrislee, Germany.

The financial situation is more than good. Thanks to the big economy all over the world and the very high quality of its products, the business has a earning of more than 25 million €.

The business goal is development and sustainable growth. Their philosophy is “high mix – low volume”. Since December 2014, the business is partner of the business-ring “Der echte Norden”.
