

Grupa LOTOS ranks among the largest companies in Poland.

It is an oil company engaged in the business of production and processing of crude oil, as well as wholesale and retail sale of high quality petroleum products. Grupa LOTOS is a producer and supplier of a number of products, including unleaded gasoline, diesel oil, diesel oil for heating purposes (light fuel oil), aviation fuel and heavy fuel oil. It also specialises in the production and sale of lubricating oils and bitumens.

In the present market situation, the key to success has become the growth of production and diversification of crude oil supplies. Grupa LOTOS, so far active only on the Baltic Sea basin, started to explore the Norwegian Shelf reservoirs in 2007. LOTOS Group extracts 5000 barrels of crude oil each day.

LOTOS Petrobaltic focuses on executing the strategy of the LOTOS Group in the upstream segment. Goodwill is created in a sustainable manner, based on the management standards of the LOTOS Group, that is with respect for the rules of social interaction and protection of natural environment.

The LOTOS Group focuses on two strategic aims within the upstream segment:

- enhancing the safety of supplies of oil processed by the refinery by obtaining access to hydrocarbon fields, and
- raising hydrocarbon production by executing programmes of increasing oil extraction from the Baltic Sea and the new projects outside Poland.
