

SHAKESPEARE AND EMOTIONS

Task 2

Task 3

- 1) The emojis that say the same thing are: 😬 = 🙈 and ❤️ = 😬
- 2) The emoticons we use on social networks help us communicate and express feelings, but they also show traits of our personality. The most introverted people, for example, are the ones who use them the most in messages, and 25% of emojis can be misinterpreted by their recipients.
- 3) It is a good idea because they transmit emotions and simplify communication.
- 4) It would be an emoji that represents someone when they are nervous.
