MY FAMILY AND TEACHERS

My literature teacher thinks that the book is important because it was for the first time when someone talked about a mental illness (schizophrenia) in a book.

My mom knows the content of the book but hasn't read it and my dad doesn't know the story.

Our chemistry teacher thinks that something like this could happen. For sure there is some substance that could change your personality but our teacher believes that it would change the person forever. It would be useful to use the substance if a person has any mental illness to help him/her.

The book is about Dr. Jekyll, a crazy scientist who is interested in proving that everyone has a good and a bad part, and he wants to divide each. The other main character of the book is Mr. Utterson, friend of Dr. Jekyll and lawyer, who tries to help him and solve the mystery, but he doesn't arrive in time because the experiment goes out of control and Jekyll finds an only way to stop Mr. Hyde.

DIFFERENT ENDING

I like how the book ends, but if I had to choose a different one, I'd prefer a happy final for Dr. Jekyll. He was only an ambitious scientist, and he never wanted to make others suffer. Yes, his ambition carried him to the chaos but, like I said, he didn't mean to hurt anyone. I'd like him to survive so, If I were Stevenson, I might make Utterson or Lanyon get an antidote to help him. And of course, Lanyon wouldn't have died.
