MY TRAVEL

THE NETHERLANDS

On these holidays I was in the Netherlands in Deen Haag (the Hague). It's a beautiful country. There were lots of bikes and for me it was a surprise. There were a lots of electric cars.

TRANSPORT

They have super transport because, you can take a bus or a train every 10 minutes.

FUNNY SITUATION FROM MY TRIP

In the Netherland when you get on public means transport you must do a "check in" and when you get off - "check out". So I went with dad to the sea by tram and is was a small problem with getting off. My dad was the first and I couldn't go out because ticket and the machine didn't. My second try was successful but it was too late and I stayed inside. I didn't panic and got off at the next stop.
