We ask him question and he answered us :

** What is your dream ? And why ?*

Professionally it is to bring something useful to science: to bring my little stone to the building

** Do you travel with your job ?*

Yes a lot in Europe for research work in cooperation with universities or companies estrangeres.

Worldwide to give or attend international congresses

** Do you have project to improve your job?*

Yes, of course, as an expert, it is my duty to develop my profession by developing new innovative techniques, for exampl

We ask him question and he answered us :

*** Would you like to study sciences in a language different from yours?**

No I give importance to learning science in the same language that Augustin Fresnel or Henri Poincaré.

But I deplore the low level of French in English in all disciplines combined
the universal language of science is mathematics for me

*** Are you thinking about continuing with your work for many time?**

Yes I consider my work as a passion a hobby that contributes to my personal development

*** What do you prefer in your job?**

The feeling of being useful to society by making rail transport ever more attractive and ever more secure
